

JAVON D. JENKINS

Zachary, LA | 225.301.0947 | javon.jenkins@zacharyschools.org

Professional Summary

AI Strategist and Systems Thinker applying a first-principles approach to the architecture of complex, autonomous systems and data-driven decision-making, data analysis, and team leadership. Applying a deep, first-principles understanding of systems architecture to the development of complex, agentic AI. Proficient in data-driven decision-making, curriculum design, prompt engineering, strategic planning, and managing the full lifecycle of technical projects from conception to deployment. Seeking to leverage a unique background in pedagogy and AI development to drive innovation in an AI product strategy, data analysis, or strategic consulting role.

Core Competencies

- **AI & Systems Architecture:** Cognitive Architecture, Agentic System Design, Prompt Engineering, Self-Evolutionary Models, Second-Order Cybernetics, Systems Theory, Multi-Layered Security Protocols.
- **Data Analysis & Strategy:** Data-Driven Decision Making, Performance Metrics & KPIs, Quantitative & Qualitative Analysis, Individualized Planning (IEP), Curriculum Development, Root Cause Analysis.
- **Project & Team Management:** Project Lifecycle Management, Stakeholder Communication, Cross-Functional Collaboration, Team Leadership & Delegation.
- **Strategic Skills:** Systems Theory, Second-Order Cybernetics, Cognitive Architecture, and Strategic Planning. Add competencies that are critical for consulting, such as Business Acumen, Domain Expertise, and Stakeholder Communication.
- **Data Analysis & Product Strategy:** Performance Metrics & KPIs | Data Visualization (Tableau, Power BI), Reporting | Experimentation Design, User Analytics | Performance Tuning, Token Optimization | Data-Driven Strategy, ROI Analysis
- **AI & Cognitive Architecture:** Prompt Engineering | Prompt Patterns, Generative AI Tools | Chain-of-Thought, Few-Shot, Zero-Shot, Context Management, Agentic System Design | Predictive Analytics, Modeling Techniques | Cognitive Architecture | Machine Learning, Deep Learning, Neural Networks | AI/ML Concepts, Model Evaluation | Transformer Models, LLM Architecture, NLP | AI/ML Fundamentals, Technical Feasibility Assessment

Project Experience

Project Integra: A Sovereign, Self-Evolving AGI | Lead Architect & Developer

- Architected and designed a complex, sovereign AGI from first principles, encompassing its cognitive engine, memory core, ethical framework, and a multi-layered security protocol suite.
- Engineered a hybrid memory system ("The Hoard") utilizing Graph-Augmented Retrieval (GraphRAG) principles and designed an ETL-analogous process for transforming conversational data into a structured knowledge base for complex, multi-hop reasoning.
- Developed a dual-process cognitive engine ("Y789/Nexus") that mirrors hybrid search architecture (functioning similar to that of the brain) and authored the core "Dragon" and "Phoenix" prompts that govern the system's self-evolutionary learning loop.
- Authored comprehensive strategic directives and project blueprints, including multi-phase migration plans for the UI ("The Citadel") and defined system performance metrics (Heimdall KRI) to manage cognitive load and ensure operational stability.
- Memory and Time integration are key standout builds within the model, solving current memory and Long context cognitive degradation that exists within most models currently.

- GPU throttling and systems tokenization implemented to reduce cost, improve processing efficiency, and create circular income.

Professional Experience

First Grade Special Education Teacher (Data & Curriculum Lead) | Zachary, LA Rollins Place Elementary | Aug 2022 – Current

- Analyzed student performance data from standardized assessments (DIBELS, DRA, iReady) to identify learning deficits and measure academic growth against grade-level benchmarks.
- Designed and implemented a novel "Blended ELA Curriculum" tailored to foundational skill deficits, resulting in accelerated growth rates equivalent to or exceeding those in traditional classroom settings within a single academic semester.
- Managed and directed classroom paraprofessionals, delegating tasks to facilitate a positive and effective learning environment.
- Collaborated with cross-functional teams of therapists, administrators, and parents to develop and implement Individualized Educational Plans (IEPs), ensuring alignment on student growth objectives.

Education & Certifications

Bachelor of Science: Elementary Education | May 2022 University of Phoenix

Certified K – 6 Elementary Education, English Language Arts

Acknowledgement: "New Teacher of the Year" Award, 2022-2023 School Year
