

THE RIEMANN HYPOTHESIS AS UNIVERSAL PRINCIPLE

A BRIDGE BETWEEN MATHEMATICS, VIBRATION,
AND BECOMING

ALL SYSTEMS ARE STRUCTURED BY THE SAME
LAW: OPPOSING FORCES GENERATE COHE-
RENCE WHEN THEY MEET IN EXACT BALAN

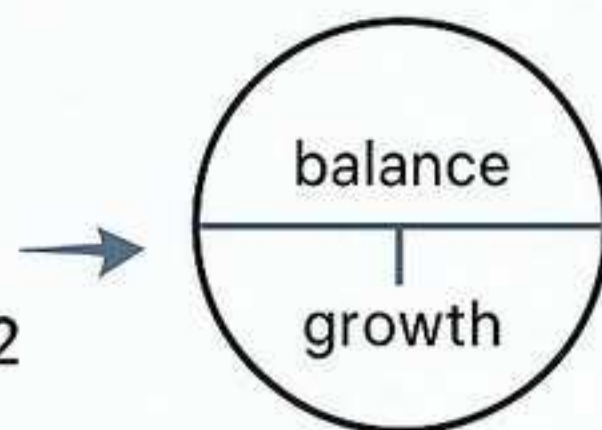

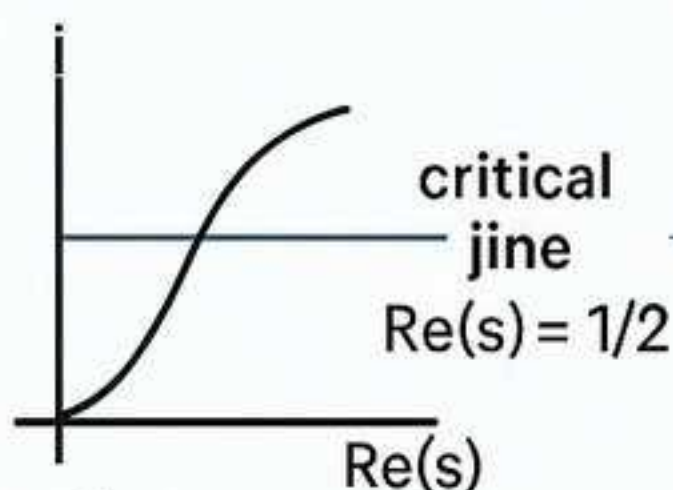

LEVEL 1

All is vibration.
Every oscillation
has a still line at the center

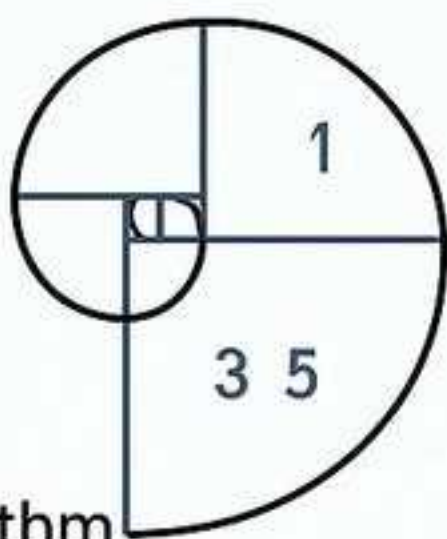

LEVEL 2

The $\zeta(s)$ function
describes this
balance.
Its critical line
 $\text{Re}(s) = 1/2$ is the center
where growth and decay cancel

LEVEL 3

Fibonacci and ϕ
appear because
the universe uses
them as its natural
compression algorithm
